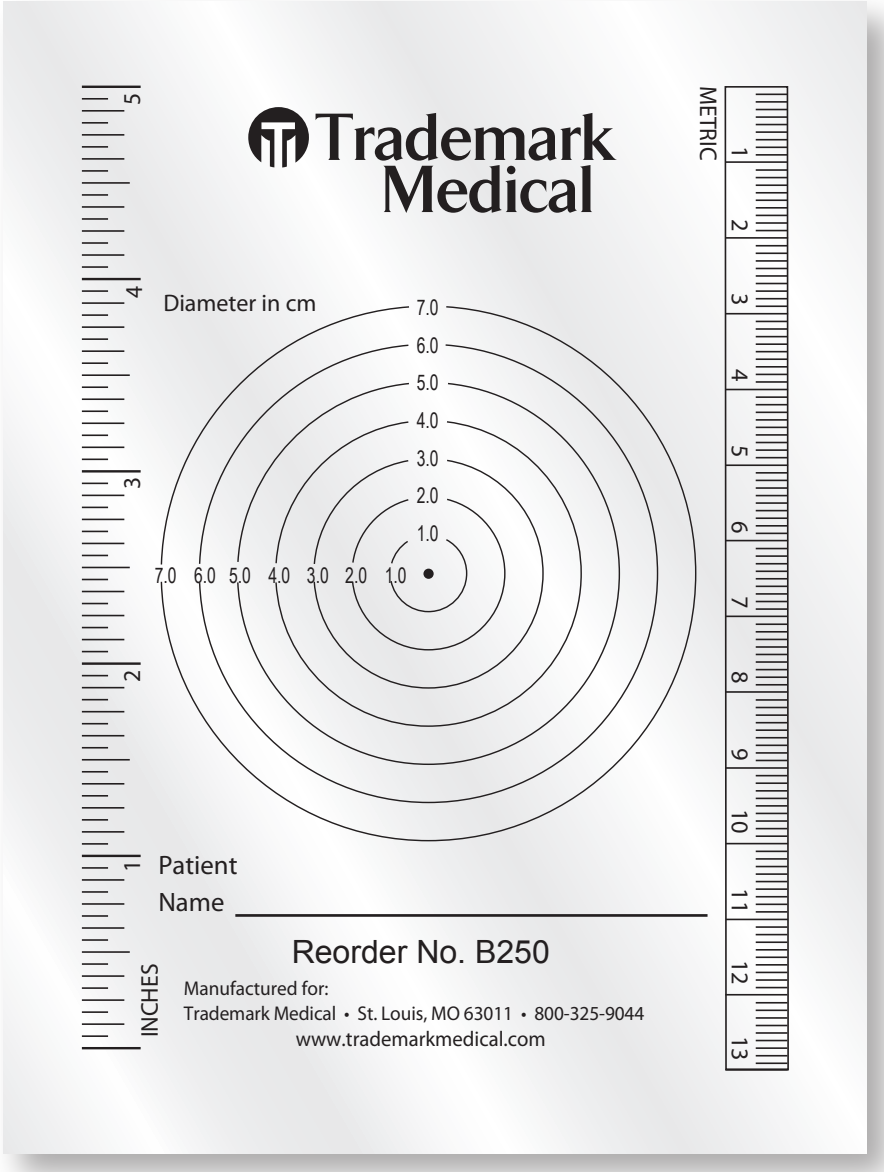
Wound Management Aids

Wound Measuring Guide

Convenient and economical documentation and monitoring of wound healing.



(Shown Acutal Size)

- The single use, disposable measuring guide enables convenient and effective measurement of dermatological wound sites such as skin lesions, pressure sores, stomas, wounds and incisions while eliminating cross contamination.
- Compliant 2 mil transparent plastic conforms to curved surfaces for greater accuracy.
- Featuring a “bullseye” for round wounds and dual scale rulers for linear wounds.
- Packed in a convenient dispenser.

Order #	Description
B250	Disposable Measuring Guide, 4 1/2” x 6” 250/package
